

Question 1

Please use this template for all your assignments. Use Arial (size 12, bold) for headings, Times New Roman (size 12, justified) for text body and references, and Arial (size 10) for figure legends. All margins are 2.54 cm. Place the assignment number and group member names in the header of each page, and page number in the footer (page x of y). Type your assignment single-spaced.

Question 2

Please don't repeat the question in your answer. Make sure your answer is complete but concise, as there will be a maximum length for each question (roughly) and points will be docked for exceeding this. Don't forget to refer to your figures (Figure 1) and references (Donelan et al., 2002; Physiology, 2012; Pratap, 2010).

Question 3

Figures can go anywhere in the text to optimize space. It is probably easiest to embed figures in a text box for formatting purposes. But, if they are big enough, they can also go on their own sheet (but not many figures will need to be this big). Figure captions can go either below or beside a figure.
